WDEQ Introduces IMPACT for Air Quality Reporting

What is IMPACT?

IMPACT is the Wyoming Air Quality Division's (AQD) new, online **I**nventory, **M**onitoring, **P**ermitting, **A**nd **C**ompliance **T**racking (**IMPACT**) data system to submit applications, reports, and documents electronically to WDEQ. System functionalities include:

- Facility Management
  - Make updates to facility configurations
  - Make changes to facility contacts
- Permitting (NSR and Title V)
  - Create and submit NSR permit applications
  - Create and submit Title V permit applications
- Emissions Reporting
  - Create and submit Title V emission inventories
- Compliance Reporting
  - Create and submit compliance reports including stack tests, CEMs, RATAs, etc

Why should you use IMPACT?

IMPACT was designed to enhance the quality, efficiency, and consistency of AQD's management of air quality data and provide a user-friendly interface for industry to submit air quality-related information. Users benefit from the ability to:

- Minimize AQD administrative permit processing times
- Minimize repetitive data entry for emission inventories and permit applications
- Submit data electronically reducing the need for paper copies
- Transparency of information between AQD and regulated community
- Validate data submissions to reduce requests for additional information

When will IMPACT be implemented?

IMPACT will come online in fall 2014 for processing NSR permits. Since IMPACT will require several new data elements, new NSR permit applications have been developed and are now available online at http://deq.state.wy.us/aqd/construction.asp. Some older forms that are used for specific permits will be retained.

IMPACT Applications Accepted Fall 2014!

Where can you learn more?

Training will be available starting in fall 2014. Visit http://deq.state.wy.us/aqd/impact.asp to learn more about IMPACT or contact AQD at deq-air-impact@wyo.gov.
